**g**alicia is always a surprising destination. This region of north-western Spain is a sharp contrast to the image typically held abroad of the Spanish landscape. A beautiful example of this is the "Playa de las Catedrales" (The Cathedrals' Beach) where you can walk into the caves when there's low tide. Galicia belongs to the **Green Spain**, with the singularity that the Rías Baixas (the low estuaries) are the sunniest part of the northern Spanish coast. With an **average temperature of 18° degrees**, it has the perfect weather to enjoy our amazing natural treasures, like the Cíes Islands, where we find the Rodas Beach that with its crystal waters and white sand is considered the best beach of the world.

Every culture and people have a former civilisation that usually has influenced the new inhabitants and their traditions. In Galicia the most numerous and spectacular remains left by previous occupants of this land are normally **Roman, Jewish** or from the Middle Ages, but the most important ones kept here are **Celtic**. They have not only left gems like the forts of Santa Tecla and Castro Baroña, but an invisible trace in the almost 3 million inhabitants character, which is warm and welcoming to the visitor.

The capital is **Santiago de Compostela**, a **UNESCO World Heritage** city that oozes history. St. James the Apostle is buried in its incredible cathedral that marks the end of the way to Santiago, **the Pilgrim's Way** that has been travelled by millions of people from all over the world for centuries.

Galicia has an enormous richness in the belowground waters with medicinal properties, what has favoured the construction of fabulous health resorts situated in spots of immense natural beauty. **Galician Spas** have very modern facilities with highly specialised staff, what makes them a reference when it comes to health tourism.

Eating in Galicia is not a necessity but an art. The Galician **gastronomy** is one of the best in Spain, and the variety is its signature. It is characterized by using healthy and natural ingredients and by the simplicity and abundance of its dishes. Our main reference is seafood and the variety of fish. This combined with the carefully selected **Galician wines** are just the perfect match.

The evolution of golf practise in Galicia has meant an important increase in the number of courses where to play this sport. Nowadays in Galicia there are **15 golf courses**, 8 of 18 holes and 7 of 9 holes. All of them are perfectly integrated in our geography and with modern facilities where the player will enjoy the variety of their designs making every day unique and unforgettable.
